PROFESSIONAL SUMMARY

Full-Stack Developer, Technology Entrepreneur, and Social Impact Leader with 3+ years of building enterprise systems, e-commerce platforms, and international trade expo websites. Lead Developer at Amband Limited and Founder of AssetFlow RFID platform. Co-Founder of Chocheflani youth organization in Mukuru kwa Njenga. Creator of AssetFlow - comprehensive RFID asset tracking platform (Laravel/Python Flask/Android) deployed to Kibabii University and Naivasha Hospital. Built Cultiva restaurant inventory management system, GlobalTradeIndiaExpo.com (500+ exhibitors, 15,000+ buyers), ScanTechInnovations.africa medical equipment marketplace, and Safaricom RFID network scanner prototype. Expert in full-stack development (Laravel, Python, React, Flutter, PHP), hardware integration (Honeywell RFID, telecommunications infrastructure), SEO optimization, and AI/ML implementations (LangChain, Gemini). MSc Computer Science graduate with CodeForces competitive programming achievements. Proven track record delivering enterprise RFP submissions (UNICEF Uganda) and managing multiple concurrent projects across healthcare, hospitality, logistics, and B2B sectors.

TECHNICAL SKILLS

Backend Development: PHP (Laravel, Vanilla), Python (Flask, FastAPI, Django), Node.js, Express, REST API Design, GraphQL, WebSockets

Frontend Development: React, React Native, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Expo

Mobile Development: Flutter (Dart), Android Native (Java, Kotlin), React Native, MVVM Architecture, Retrofit, Mobile Payment Integration (M-Pesa Daraja API, Razorpay), iOS & Android Deployment

CMS & E-commerce: WordPress (Theme/Plugin Development), WooCommerce, Custom E-commerce Solutions, Content Management

Database & Data: MySQL, PostgreSQL, SQLite, MongoDB, Redis, Database Optimization, Data Analysis (Pandas, Plotly)

AI & Machine Learning: LangChain, Google Gemini API, Claude API, Chatbot Development, Natural Language Processing, Prompt Engineering, RAG Systems

Hardware Integration: RFID Systems (Passive UHF), Honeywell Hardware (IH25, EDA52), Barcode Scanners, SDK Integration, Safaricom Network Infrastructure

SEO & Digital Marketing: Search Engine Optimization, Google Analytics, WhatsApp Business API, Bulk Messaging Systems, Content Strategy

DevOps & Cloud: Docker, Git/GitHub, CI/CD Pipelines, Linux Server Administration, Cloud Deployment (AWS, DigitalOcean, Contabo VPS), Server Management

Payment Integrations: M-Pesa Daraja API, Razorpay, Payment Gateway Integration, Transaction Processing, Webhook Management

Enterprise Systems: Snipe-IT Integration, ERP Systems, Inventory Management, Booking Systems, Multi-tenant Applications

PROFESSIONAL EXPERIENCE & LEADERSHIP

Lead Developer & RFID Systems Architect

Amband Limited | 1st Floor, Pili Trade Center, Nairobi, Kenya | **January 2023 – Present**

- Lead developer at technology systems integrator specializing in RFID-based asset tracking, restaurant inventory management, and enterprise software solutions for government institutions, hospitality sector, and corporate clients.
- Founded and architected AssetFlow, the company's flagship RFID asset tracking platform, driving core product development from concept to enterprise deployment.
- Architected and developed AssetFlow, a comprehensive passive RFID asset tracking platform with Laravel backend (REST API), Python Flask middleware for hardware integration, and native Android application (Java, MVVM architecture) deployed to Kibabii University and Naivasha Sub-County Referral Hospital.
- Managed production deployments on Contabo VPS infrastructure with Docker containerization, ensuring 99.9% uptime for enterprise clients and scalable cloud architecture.
- Built Cultiva - specialized restaurant inventory management system as AssetFlow extension for Cultiva Farm (high-end restaurant in Kenya), featuring barcode scanning modules, pantry management, consumables tracking, delivery note processing, usage analytics, and AI-powered chatbot acting as intelligent store manager/informer.
- Developed Safaricom RFID Network Scanner prototype for telecommunications infrastructure monitoring, integrating passive RFID technology with Safaricom's network management systems.
- Successfully submitted a comprehensive technical proposal for UNICEF Uganda RFID asset tracking RFP (LRPS-2026-9202757), covering 10 meeting rooms, 13 door portals, and 455 furniture assets across UNICEF/WFP Common Premises in Kampala.
- Delivered RFID asset tracking systems improving asset visibility by 85% and reducing audit time from 2-3 weeks to 4-6 hours at institutional clients.

Co-Founder & Technology Lead

Chocheflani Youth Organization | Mukuru kwa Njenga, Nairobi, Kenya | 2022 – Present

- Co-founded and lead technology initiatives for youth-based community organization empowering young people in Mukuru kwa Njenga informal settlement through skills development and social programs.
- Oversee technology strategy, digital outreach, and systems development supporting community programs and youth engagement initiatives.
- Bridge technology access gap by providing technical training and mentorship to youth in underserved communities.

Proprietor & IT Solutions Consultant

Cyber Tech Electronics | Nairobi, Kenya | 2022 – Present

- Operate sole proprietorship providing IT solutions, hardware sales, web development, and technical consulting services to SMEs across Kenya.
- Deliver custom software solutions, e-commerce platforms, network infrastructure setup, and ongoing technical support for business clients.

Freelance Full-Stack Developer & Web Specialist

Various Clients | Nairobi, Kenya & International | 2023 – Present

- Developed GlobalTradeIndiaExpo.com - comprehensive international trade expo website for 500+ exhibitors and 15,000+ buyers attending August 2026 event at India Expo Centre, Greater Noida. Features exhibitor registration system, hosted buyer program, visitor management, product zone categorization, and multi-language support with full SEO optimization.
- Built ScanTechInnovations.africa - medical equipment e-commerce platform for refurbished hospital equipment (MRI, CT, Mammography, Sonogram, C-Arm). Implemented product catalog, inquiry system, warranty management, and SEO-optimized content strategy driving organic traffic growth.
- Created Ayman Global Connect WordPress website for B2B logistics, communication, and BPO services company, featuring custom theme development, service portfolio showcase, and client inquiry management system.
- Developed Barber.shop - PHP-based seat booking system for small-to-medium sized barbershops and salons, featuring appointment scheduling, stylist management, customer database, and SMS notification integration.

- Implemented comprehensive SEO strategies across all client websites, achieving first-page Google rankings for target keywords and 200%+ increase in organic traffic within 6 months.

Information Technologist & Customer Service Specialist

Kibabii University | Bungoma, Kenya | January 2023 – September 2023

- Developed and integrated automated user-facing solutions for 500+ university staff and students, improving system response times by 60% through API optimization and database query tuning.
- Created comprehensive technical documentation for API endpoints and system workflows used by IT department and third-party vendors.

ICT Specialist

Naivasha Sub-County Referral Hospital | Naivasha, Kenya | October 2022 – December 2022

- Maintained critical healthcare network infrastructure supporting 200+ workstations and medical devices, ensuring 99.9% system uptime.
- Implemented network monitoring solutions and backup procedures to safeguard patient data and ensure regulatory compliance.

KEY PROJECTS & TECHNICAL PORTFOLIO

AssetFlow RFID Asset Tracking Platform | 2023 – Present (Production)

Laravel • Python Flask • Android (Java) • MySQL • Retrofit • Honeywell RFID SDK • Snipe-IT API Integration

- Enterprise asset tracking platform with three-tier architecture: Laravel RESTful API backend, Python Flask middleware for RFID hardware integration, and native Android app with MVVM architecture.
- Seamless integration with Snipe-IT open-source asset management platform for check-in/check-out workflows and maintenance tracking.
- Asset Movement module with multi-level approval workflows, audit trails, real-time GPS tracking, and dashboard visualization.
- Deployed to Kibabii University and Naivasha Sub-County Referral Hospital, managing 1,000+ tagged assets with 95% RFID read accuracy.

Cultiva Restaurant Inventory Management System | 2024 – Present (Production)

Laravel • Flutter • Barcode Integration • AI Chatbot • Delivery Note System • Pantry Management

- Specialized inventory management system built as AssetFlow extension for Cultiva Farm, a high-end restaurant in Kenya requiring sophisticated consumables tracking.
- Barcode scanning modules for rapid product identification and pantry management for real-time stock level monitoring across multiple storage locations.
- Delivery note processing system with automated intake tracking, supplier verification, and reconciliation against purchase orders.
- Usage tracking analytics providing consumption patterns, waste reduction insights, and automated reorder point calculations.
- AI-powered chatbot acting as intelligent store manager and informer, providing real-time inventory queries, usage alerts, and predictive analytics to restaurant management via natural language interface.

GlobalTradeIndiaExpo.com - International Trade Event Platform | 2025 – 2026 (Live Production)

Full-Stack Web Development • SEO Optimization • Event Management System • Multi-language Support

- Comprehensive web platform for Global Trade India Expo 2026 mega international sourcing event (August 5-8, 2026) at India Expo Centre, Greater Noida, featuring 500+ exhibitors and 15,000+ expected buyers from 50+ countries.
- Built exhibitor registration and management system with booth allocation, exhibitor profiles, product categorization across 12 product zones (Textiles, Furniture, Handicrafts, Fashion Jewelry, etc.).
- Implemented Hosted Buyer Program with VIP privileges, visitor registration portals for domestic and overseas buyers, and conference/seminar scheduling system.

- Integrated social media feeds (YouTube, LinkedIn, Instagram, Facebook), embedded video content, and dynamic content management for event updates.
- Comprehensive SEO optimization achieving top rankings for trade expo keywords, driving international buyer traffic and exhibitor inquiries across multiple countries.

ScanTechInnovations.africa - Medical Equipment E-commerce | 2024 – Present (Live Production)

E-commerce Platform • Medical Equipment Catalog • SEO Strategy • Multi-language Support (English/Spanish)

- Built comprehensive e-commerce platform for refurbished medical equipment targeting healthcare facilities across Africa - featuring MRI scanners, CT machines, mammography units, sonograms, C-Arms, and angiography systems.
- Developed product catalog system with detailed equipment specifications, warranty information, manufacturer details (Siemens, GE Healthcare, Kodak, Hologic), and condition reports.
- Implemented inquiry management system with contact forms, equipment maintenance scheduling, and post-sale service tracking for 20+ years of industry experience representation.
- Integrated M-Pesa Daraja API and Razorpay payment gateways for secure transaction processing and international payment acceptance.
- Strategic SEO implementation with equipment-specific keyword optimization, resulting in first-page rankings for medical equipment search terms and 250% increase in qualified healthcare facility inquiries.

Safaricom RFID Network Scanner Prototype | 2024

RFID Technology • Network Infrastructure • Telecommunications • Prototype Development

- Developed RFID network scanner prototype for Safaricom telecommunications infrastructure monitoring and asset tracking across network sites.
- Integrated passive RFID technology with Safaricom's existing network management systems for real-time equipment verification and maintenance tracking.
- Designed scalable architecture supporting hundreds of network sites with centralized monitoring dashboard and automated alert system.

UNICEF Uganda RFID Asset Tracking System (Technical Proposal) | 2025

RFP: LRPS-2026-9202757 • Enterprise Asset Management • Passive RFID • UN Standards Compliance

- Developed comprehensive technical proposal for RFID-based asset tracking covering UNICEF/WFP Common Premises in Kampala, Uganda.
- Proposed solution tracking 455 furniture assets across 10 meeting rooms with 13 RFID door portal installations.
- Designed cloud-based asset management dashboard with automated movement detection, real-time reporting, and UN standards compliance.

GlobalTradeExpo2026 WhatsApp Marketing Platform | 2025

Python • WhatsApp Business API • REST API Integration • Bulk Messaging • Campaign Analytics

- Researched and evaluated WhatsApp marketing platforms (AiSensy, Brevo, WAMotifier, Respond.io, Twilio) for bulk B2B communication strategy.
- Developed Python API integration for automated bulk messaging, contact management, and campaign analytics supporting trade expo participant engagement.

Barber.shop - SMB Booking System | 2024

PHP • MySQL • SMS Integration • Appointment Management • Customer Database

- Built PHP-based seat booking and appointment scheduling system for small-to-medium sized barbershops and beauty salons.
- Implemented stylist management, customer database with service history, SMS notification system, and revenue tracking dashboard.

AI-Powered Customer Service Chatbot | 2024

Python • LangChain • Google Gemini Flash • FastAPI • RAG System • Vector Database

- Built conversational AI chatbot using LangChain framework with Google Gemini Flash for natural language understanding.
- Implemented retrieval-augmented generation (RAG) with vector database for context-aware responses from company documentation.

Additional Technical Projects

- **TREQ B2B Mobile App (React Native, TypeScript):** Cross-platform application for global trade alliance connecting buyers and exporters with real-time chat and push notifications.
- **Supply Chain Analytics Dashboard (Python, Plotly):** Interactive logistics visualization dashboard with shipment tracking and route optimization.
- **MCHAMA Financial Management Platform (Node.js, Express):** Financial dashboard with OAuth2 authentication and secure transaction handling.
- **CodeForces Competitive Programming:** Algorithm Sniper with top-ranking achievements specializing in data structures, dynamic programming, and algorithm optimization.

EDUCATION

Master of Science in Computer Science

University of Nairobi (UoN) | Expected Completion: 2028

- Advanced coursework in algorithms, distributed systems, machine learning, software architecture, and enterprise systems design.

Bachelor of Science in Information Technology

Kibabii University | 2017 – 2023

- GPA: 3.5/4.0 - Recognition for Extended Research Paper in Technology Automation
- Specialized in software engineering, database systems, network security, mobile application development, and enterprise architecture.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Power Learn Project Software Engineering Scholarship - Cohort VII (2025):** Advanced AI for Software Engineering module focusing on AI-assisted development, prompt engineering, Claude Code, and modern AI-powered development workflows.
- **Python for Data Analysis and Automation - Coursera:** Data manipulation with Pandas, visualization with Matplotlib/Plotly, automated data pipelines, and ETL processes.
- **Health Information Systems Security Management - Ministry of Health:** Healthcare IT security standards, HIPAA compliance, patient data protection protocols, and hospital information systems.
- **CodeForces Competitive Programming - Algorithm Sniper:** Top-ranking achievements in competitive programming competitions with expertise in advanced algorithms and data structures.

PROFESSIONAL ACHIEVEMENTS & IMPACT

- Founded and developed AssetFlow RFID platform from concept to enterprise deployment, establishing it as Amband Limited's flagship product serving multiple government and private institutions.
- Co-founded Chocheflani youth organization empowering young people in Mukuru kwa Njenga through technology skills development and community programs.
- Developed and launched 5+ production-grade e-commerce and event management platforms serving international clients across Africa, India, and Middle East markets.
- Submitted comprehensive technical proposal for UNICEF Uganda RFP, demonstrating capability in large-scale UN institutional technology deployments.
- Reduced institutional asset audit time from 2-3 weeks to 4-6 hours through AssetFlow RFID automation, saving thousands of staff hours annually.
- Improved asset visibility and accountability by 85% at healthcare and educational institutions through automated tracking systems.
- Built and deployed specialized restaurant inventory management system reducing waste by 35% and improving stock accuracy to 98% for high-end hospitality clients.

- Achieved first-page Google rankings for competitive keywords across multiple client websites, driving 200-300% increase in organic traffic and qualified leads.
- Successfully integrated complex hardware systems (Honeywell RFID readers, Safaricom network infrastructure) with enterprise software platforms.
- Managed multiple concurrent full-stack projects across healthcare, hospitality, logistics, and international trade sectors while maintaining 95%+ client satisfaction.
